

Data Sharing Statement

Article Info	http://dx.doi.org/10.21037/aob-20-51	
Item	Question	Authors' Response (place "-" if not applicable)
1	Would you like to share data collected for your study to others?	Yes.
2	If not, would you like to share the reason for your decision?	-
3	What data in particular will be shared?	PDB structures of predicted GYPA extracellular domain monomer models.
4	Any other documents will be shared? Such as study protocol, statistical analysis plan, informed consent form, clinical study report, analytic code.	The .mdp, .trr and RMSD files will be shared if requested.
5	When will data availability begin?	From the publication date.
6	When will data availability end?	Data availability will end if a differing GYPA extracellular domain model is determined to be a more accurate representation and this model becomes invalid.
7	To whom will you share the data?	Those within the field who wish to continue modelling work using our models as a template or comparative model.
8	For what type of analysis or purpose?	To improve the GYPA extracellular domain model, or that of other glycoporphins. To investigate structural, antigenic or functional features of the GYPA extracellular domain.
9	How or where can the data/documents be obtained?	Emails could be sent to the address below to obtain the shared data: x.bui@uq.edu.au
10	Any other restrictions?	We may balance the potential benefits and risks for each request and then provide the data that could be shared.
