Reviewer A

Gabapentin 1000mg per day is rather high as initial dosing. Is it divided doses? Is it titrated upwards gradually? How is the dosing justified? Any work up for thyroid disorder? Mentioning of renal function is important as well. Why gabapentin and not other treatment such as amitriptyline? What is the decision making process like?

We added some data and modified our text. (Page 6, lines 6-11) (Page 5, 13-15)

Reviewer B

**In the Introduction you could refer a paper that correlates pruritus and neurologic sensitivation: Neurophysiological assessment of brachioradial pruritus patients / Avaliação neurofisiológica de pacientes com prurido braquiorradial
Miller LHG, Akita J, Martelli ACCi; Kirchner DR, Salgado MH, Garbino JA. Arq. neuropsiquiatr; 79(10): 900-903, Oct. 2021. I also suggest that you could consult this article literature and expand yours.**

We added some data and modified our text as suggested. (Page 3, lines 20- page 4 line

2) (Page 9, lines 13-15)
