Cover

Pazopanib alleviates LPS-induced inflammation through the MEK4-JNK-AP-1 pathway. A schematic diagram shows our small molecule compound library screening, and the VEGFR inhibitor pazopanib inhibits microglial hyperactivation and protects dopaminergic neurons from neuroinflammation-induced cell death in vitro and in vivo. Pazopanib alleviates LPS-induced neuroinflammation by inhibiting the MEK4-JNK-AP-1 pathway. See the article in pages 1135–1148.
