

Figure S1 Covariates before and after propensity score matching (elective cases). GFR, glomerular filtration rate; LVEF, left ventricular ejection fraction; NYHA, New York Heart Association classification of heart failure; ASA, American Society of Anesthesiologists physical status classification; CABG, coronary artery bypass grafting.

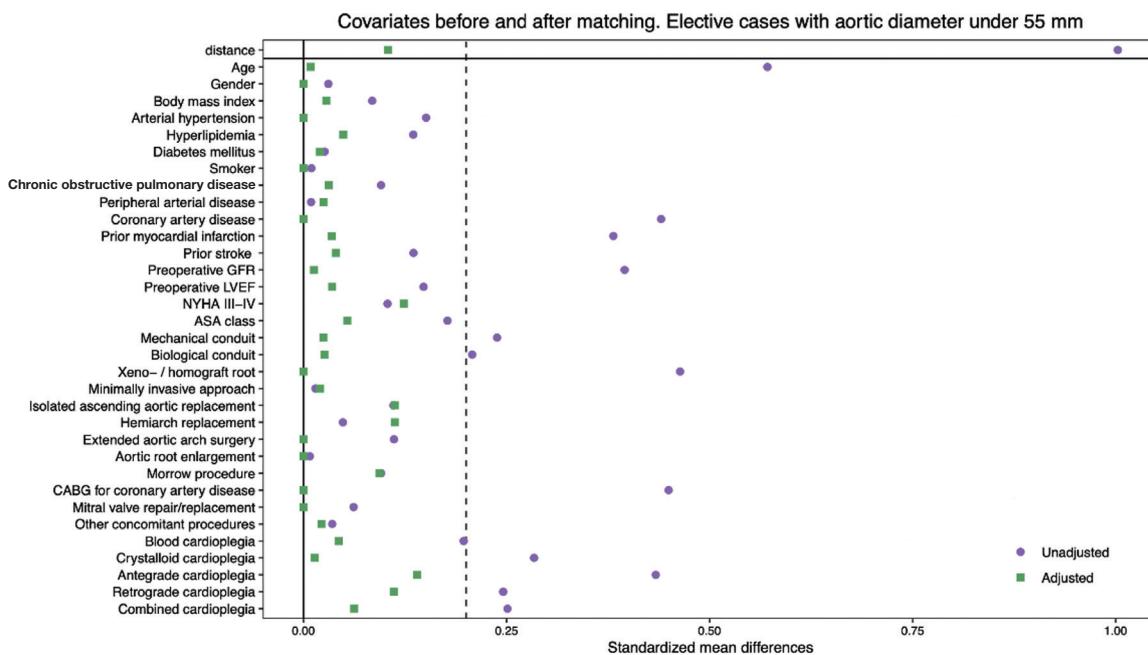

Figure S2 Covariates before and after propensity score matching (elective cases with aortic diameter under 55 mm). GFR, glomerular filtration rate; LVEF, left ventricular ejection fraction; NYHA, New York Heart Association classification of heart failure; ASA, American Society of Anesthesiologists physical status classification; CABG, coronary artery bypass grafting.
