

Table S1 Stratified burnout outcome by professional role across post-integration time points

Professional role/item	6-month post-intervention (n=9)	12-month post-intervention (n=13)	18-month post-intervention (n=10)	24-month post-intervention (n=10)
Radiation Oncologist Scores				
Feeling burnout, n (%)				
No	5 (55.6%)	13 (100.0%)	12 (92.3%)	10 (100.0%)
Yes	4 (44.4%)	0 (0.0%)	1 (7.7%)	0 (0.0%)
Resident Scores				
	6-month post-intervention (n=2)	12-month post-intervention (n=4)	18-month post-intervention (n=6)	24-month post-intervention (n=2)
Feeling burnout, n (%)				
No	2 (100.0%)	4 (100.0%)	6 (100.0%)	2 (100.0%)

P values are not reported for stratified analysis due to small sample size across time points.
