

Figure S1 Proportional hazards for ACC and ABC patients. (A) Age; (B) race; (C) marital status; (D) surgery; (E) chemo or/and radiotherapy; (F) primary site; (G) is primary; (H) histological group; (I) regional nodes. ABC, adenoid basal carcinoma; ACC, adenoid cystic carcinoma; Chemo, chemotherapy; RT, radiotherapy.

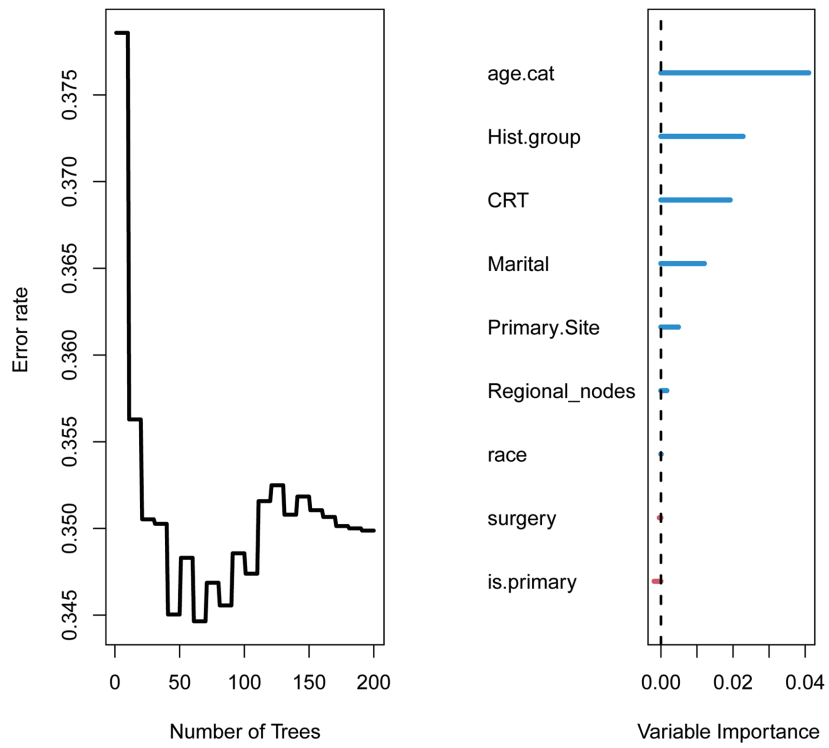

Figure S2 Random-forest screening variables for nomograms.

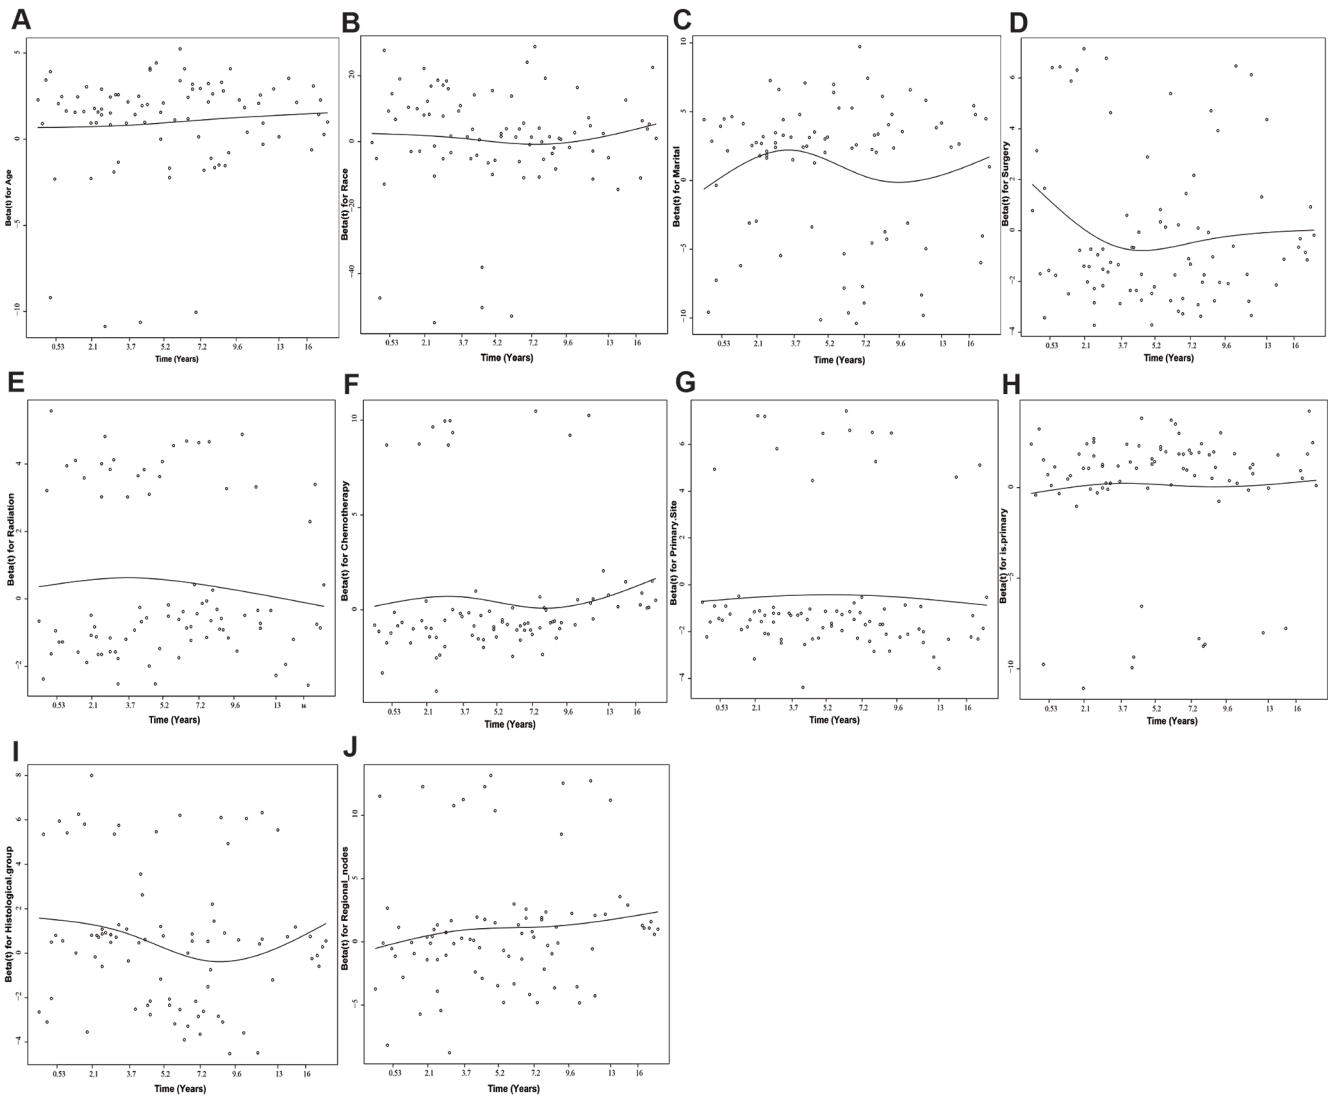

Figure S3 Proportional hazards for radiotherapy or chemotherapy patients. (A) Age; (B) race; (C) marital status; (D) surgery; (E) radiation; (F) chemotherapy; (G) primary site; (H) is primary; (I) histological group; (J) regional nodes.

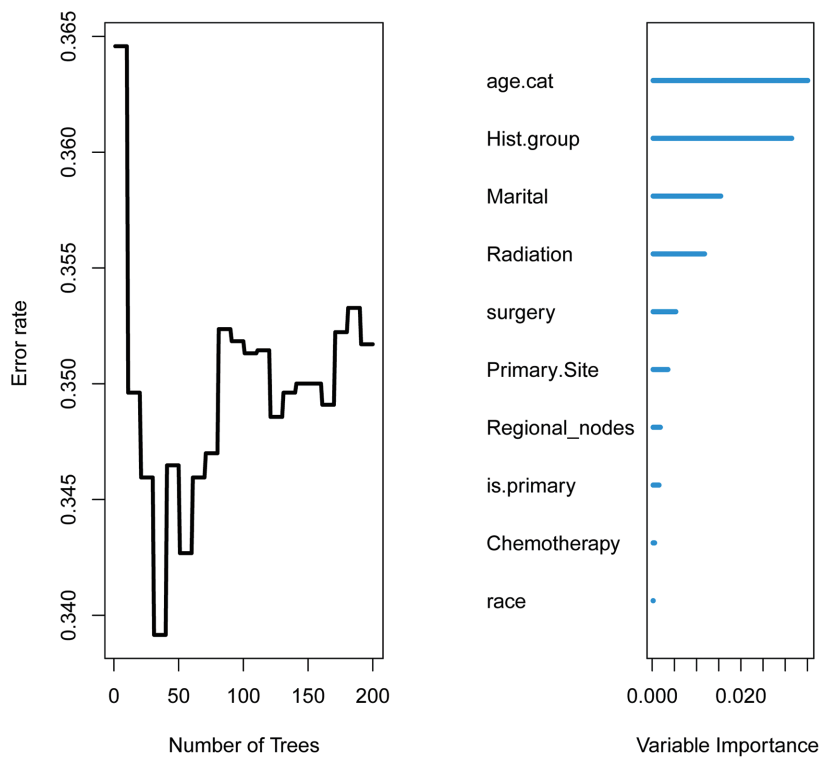

Figure S4 Random-forest screening variables for nomograms for radiotherapy or chemotherapy patients.
