

Figure S1 Sox11 rescues OGD/R-induced reductions in cell proliferation. Quantitative analysis of proliferation was performed in each group using the EdU assay. For statistical analysis, different letters showed significant differences between groups in SH-N-SH or SH-SY5Y cells. OGD/R, oxygen-glucose deprivation/reoxygenation; EdU, 5-Ethynyl-2'- deoxyuridine; OE, Overexpression; CTRL: Control.
