

Figure S1 The second part of Kaplan-Meier survival analysis of OS and RFS in different clinical conditions for COAD patients with the combination of ACTL6B, S1PR3, and PPP2R2B. (A) Kaplan-Meier survival analysis of the three gene signatures for OS and RFS between stage 1+2 and 3+4 patients. (B) Kaplan-Meier survival analysis of the three gene signatures for OS and RFS on the condition of different oncogenes mutation. (C) Kaplan-Meier survival analysis of the three gene signatures for OS and RFS on the condition of MSI high or low. (D) Kaplan-Meier survival analysis of the three gene signatures for OS and RFS from left and right colon cancer patients.
