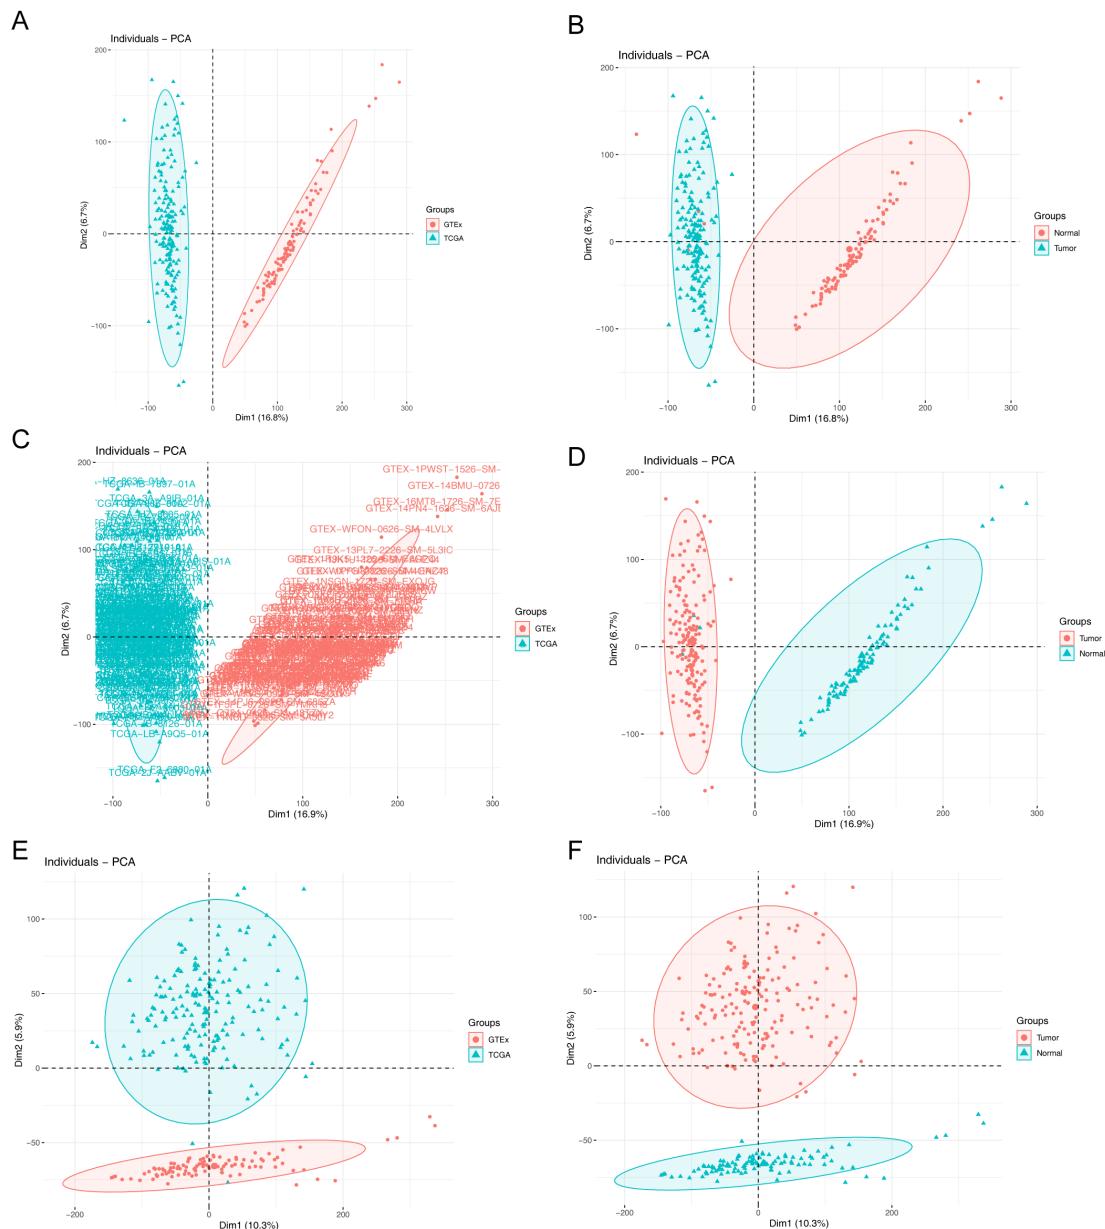

Figure S1 The distribution of TCGA and GTEx samples. (A-D) The distribution of TCGA and GTEx samples before correction. (E,F) The distribution of TCGA and GTEx samples after correction. PCA, principal component analysis; TCGA, The Cancer Genome Atlas.

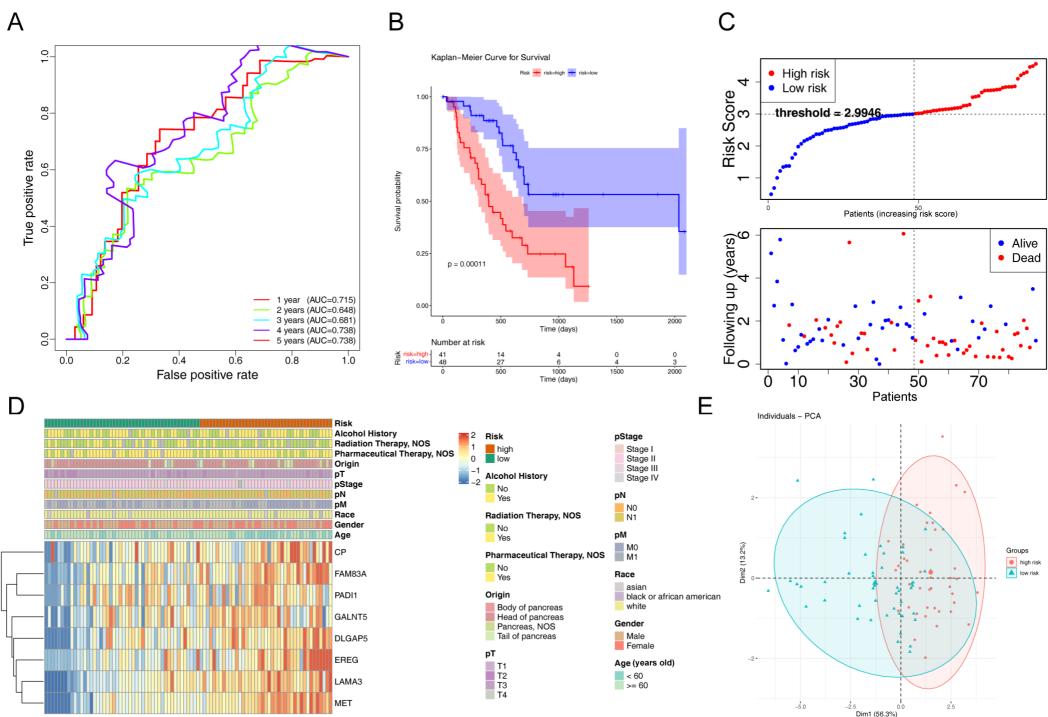

Figure S2 The validation results of the internal sets. (A) ROC curves for 1- to 5-year survival in the internal sets. (B) K-M curves of the high- and low-risk groups in the internal sets. (C,D) The distribution of the clinicopathological variables and eight model genes in the high- and low-risk groups. (E) PCA of the high- and low-risk groups in the internal sets. AUC, area under the curve; NOS, not otherwise specified; ROC, receiver operating characteristic; K-M, Kaplan-Meier; PCA, principal component analysis.

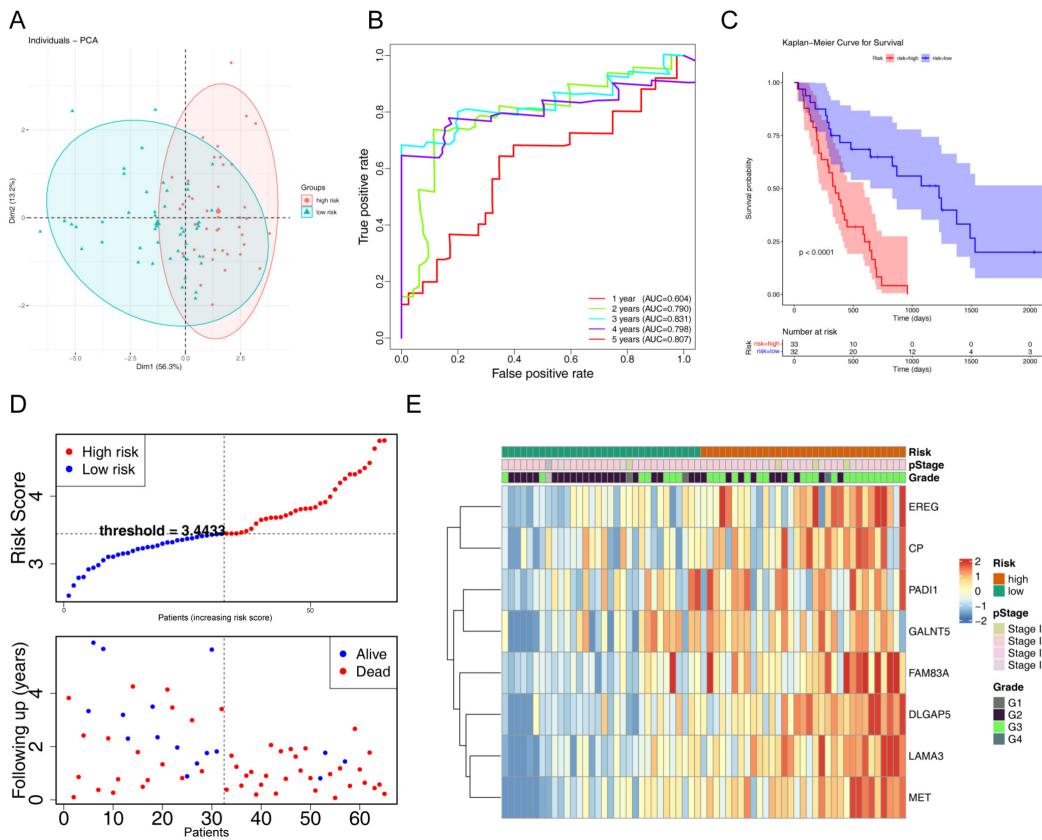

Figure S3 The validation results of the external sets (GSE62452). (A) PCA of the high- and low-risk groups in the external sets (GSE62452). (B) ROC curves for 1- to 5-year survival in the external sets (GSE62452). (C) K-M curves of the high- and low-risk groups in the external sets (GSE62452). (D,E) The distribution of the clinicopathological variables and eight model genes in the high- and low-risk groups. PCA, principal component analysis; AUC, area under the curve; ROC, receiver operating characteristic; K-M, Kaplan-Meier.
