

PROTOCOL (CXR)	BEFORE INITIATIVE	AFTER INITIATIVE
Day 0	Systematically performed	Performed only if symptoms
After drain removal	Systematically performed	Performed only if symptoms
Outpatient follow-up (Day 10–14)	Systematically performed	Performed only if symptoms
During hospitalization outside of routine procedure	Performed if symptoms	Performed if symptoms

Figure S1 Summary of chest X-ray protocols before and after the quality improvement initiative. CXR, chest X-ray.

Table S1 CXR results and outcome 10 months after the start of the initiative

CXR results and outcome	Values (N=22)
Type of resection, n (%)	
Wedge resection	8 (26.4)
Segmentectomy	5 (22.7)
Lobectomy	9 (40.1)
Postoperative CXR, n (%)	17 (77.3)
CXR without indication [n/total (%)]	2/5 (40%)
Readmission \leq 30 POD, n (%)	0 (0)

CXR, chest X-ray; POD, postoperative day.
