Table S1 Association between the inflammatory score and new-onset CLD disease

Characteristics	Inflammation score, OR (95 % CI)	P
IS		
Model 1	1.11 (1.04–1.18)	0.00119*
Model 2	1.10 (1.03–1.17)	0.00272*
Model 3	1.10 (1.03–1.17)	0.00433*

Model 1: Crude model; Model 2: Adjusted for age, gender, educational level, residence, marital status, BMI; Model 3: Adjusted for age, gender, educational level, residence, marital status, BMI, smoking status, drinking status. *, P value for linear trend calculated from category median values ($P < 0.05$). BMI, body mass index; CI, confidence interval; IS, inflammatory score; OR, odds ratio; Ref, reference.
