

Table S1 List of variables used to triage case priority and selection for limited operating room availability

Presumed diagnosis (Each variable below scored on a 0–100 scale based on degree of severity with 0 being not urgent and 100 being extremely urgent)

Likelihood of cancer

Aggressiveness of cancer

Neoadjuvant window impact

Impact of information on management and plan

Sepsis severity

Perforation/leak

Dyspnea

Pneumothorax

Dyspnea

Dysphagia

Hemoptysis

Hematemesis/ gastrointestinal bleed

Tamponade

Hemothorax

Effusion

Pain

Aspiration

Anxiety

Cough

Gastrointestinal reflux

Cough

Other symptom severity

Score

Urgency assessment
