

Table S1 Metanalyses published comparing the outcome of death when using air versus 100% oxygen for neonatal resuscitation

Author	Decreased mortality with air (95% CI)	Number of studies [n = total patients]
Davis <i>et al.</i> , 2004 (48)	RR 0.71 (0.54–0.94)	5 [1,302]
Tan <i>et al.</i> , 2004 (49)	RR 0.71 (0.54–0.94)	5 [1,302]
Tan <i>et al.</i> , 2005 (50)	RR 0.71 (0.54–0.94)	5 [1,302]
Saugstad <i>et al.</i> , 2005 (51)	OR 0.57 (0.42–0.78)	5 [881]
Saugstad <i>et al.</i> , 2008 (52)	RR 0.69 (0.54–0.88)	10 [2,133]
Welsford <i>et al.</i> , 2019 (53)	RR 0.73 (0.57–0.94)	10 [2,164]

CI, confidence interval; RR, relevant risk; OR, odds ratio.
