

## Supplementary

**Table S1** Correlations between the domain scores of the Edmonton frailty scale (n=40)

	General health status	Functional independence	Medication use	Nutrition	Mood	Continence	Functional performance
<b>Cognition</b>							
r	0.154	-0.446	-0.034	-0.107	-0.161	-0.017	0.590
Significance	0.343	0.004**	0.837	0.511	0.322	0.918	<0.001***
<b>General health status</b>							
r		0.085	0.018	0.191	-0.016	-0.058	-0.009
Significance		0.604	0.911	0.238	0.924	0.723	0.955
<b>Functional independence</b>							
r			-0.057	0.203	0.048	0.109	-0.782
Significance			0.726	0.209	0.766	0.502	<0.001***
<b>Medication use</b>							
r				0.114	0.200	0.085	0.127
Significance				0.483	0.217	0.603	0.434
<b>Nutrition</b>							
r					0.250	0.051	-0.069
Significance					0.120	0.757	0.673
<b>Mood</b>							
r						0.076	0.080
Significance						0.642	0.623
<b>Continence</b>							
r							0.074
Significance							0.649
