

**Supplementary****Table S1** Medical history for the CTOs with left ventricular ejection fraction decreased or preserved

	LVEF <sub>p</sub> (n=41)	LVEF <sub>d</sub> (n=14)	$\chi^2$ value	P value
Beta blocker, n	31	10	0.59	0.96
Nitrate, n	22	6		
ACEI, n	15	6		
Loop/thiazide diuretics/MRA, n	3	1		

LVEF<sub>d</sub>, left ventricular ejection fraction decreased; LVEF<sub>p</sub>, left ventricular ejection fraction preserved.
