

Figure S1 Cumulative risk curves for CSS in different subgroups. (A) Stage; (B) T stage; (C) N stage; (D) grade; (E) surgical method; (F) radiotherapy method; (G) pathological type; (H) brain metastases; (I) pulmonary metastases; (J) marital status.

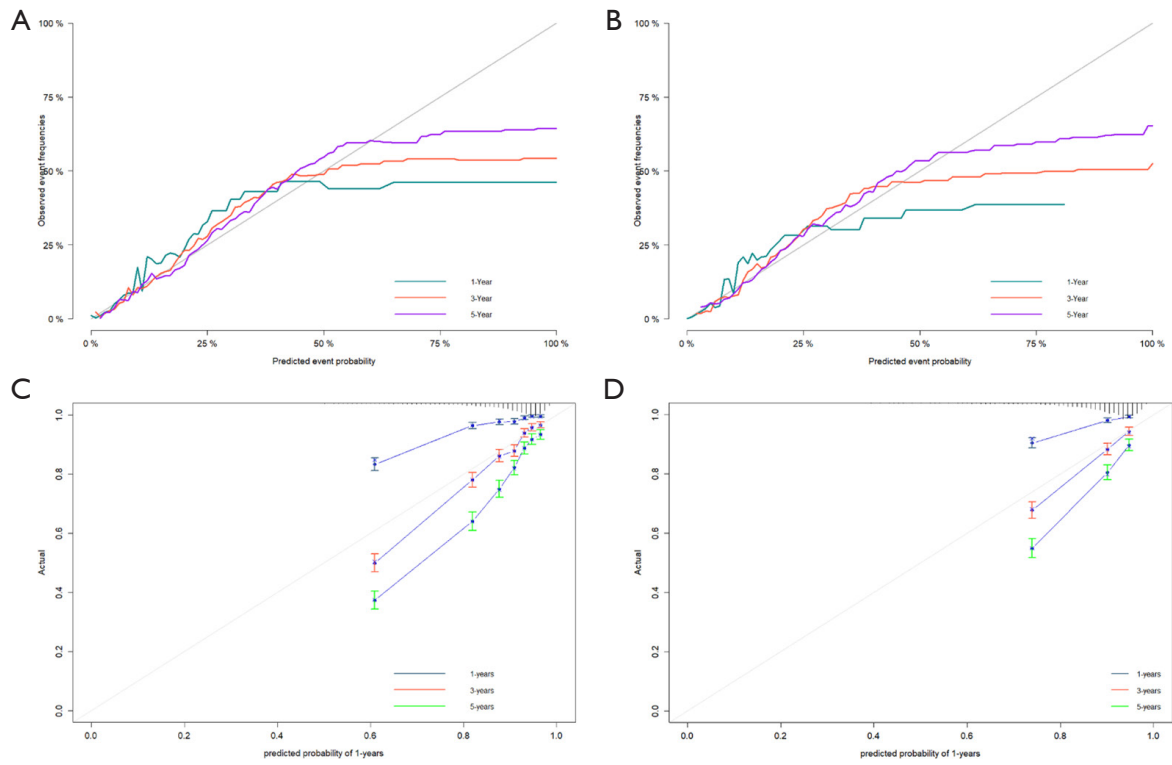

Figure S2 Calibration plots of competing risk nomograms for CSS in postmenopausal EC patients undergoing surgery combined with radiotherapy in (A) training cohort and (B) validation cohort, and calibration plots of Cox proportional hazards nomograms for (C) training cohort and (D) validation cohort.
