

**Figure S1** Expression and inter-member correlations of CCT family members in HCC. (A) The expression of CCTs is upregulated in HCC tissues (n=369) compared with normal tissues (n=50) in TCGA. (B) The expression of CCTs is upregulated in HCC tissues (n=225) compared with normal tissues (n=220) in GSE14520. (C) CCTs expression in 50 paired HCC (n=50) and adjacent normal tissue (n=50) samples from TCGA. (D) CCTs expression in 214 paired HCC (n=214) and adjacent normal tissue (n=214) samples from GSE14520. (E) Inter-member correlations of CCT family members in HCC from TCGA. (F) Inter-member correlations of CCT family members in HCC from GSE14520. \*, P<0.05; \*\*, P<0.01; \*\*\*, P<0.001.
