

Figure S1 m6A related genes significantly differentially expressed between CESC and normal tissues in GSE7803. (A-D) The expression of YTHDF1, RBM15, IGF2BP2, HNRNPA2B1 between CESC and normal tissues in GSE7803. m6A, N6-methyladenosine; CESC, cervical cancer. * $P < 0.05$; ** $P < 0.01$; *** $P < 0.001$.
