

Figure S1 Kaplan-Meier survival curves between groups. (A) OS of patients with TS interval of >2.0-3.0 and >3.0-4.0 cm who did not received postoperative chemotherapy before PSM; (B) OS of patients with TS interval of >2.0-3.0 cm and >4.0-5.0 cm who received postoperative chemotherapy before PSM; (C) OS of patients with TS interval of >2.0-3.0 and >4.0-5.0 cm who did not received postoperative chemotherapy before PSM; (D) OS of patients with TS interval of >2.0-3.0 cm with and without postoperative chemotherapy before PSM. OS, overall-survival; TS, tumor size; PSM, propensity score matching.
