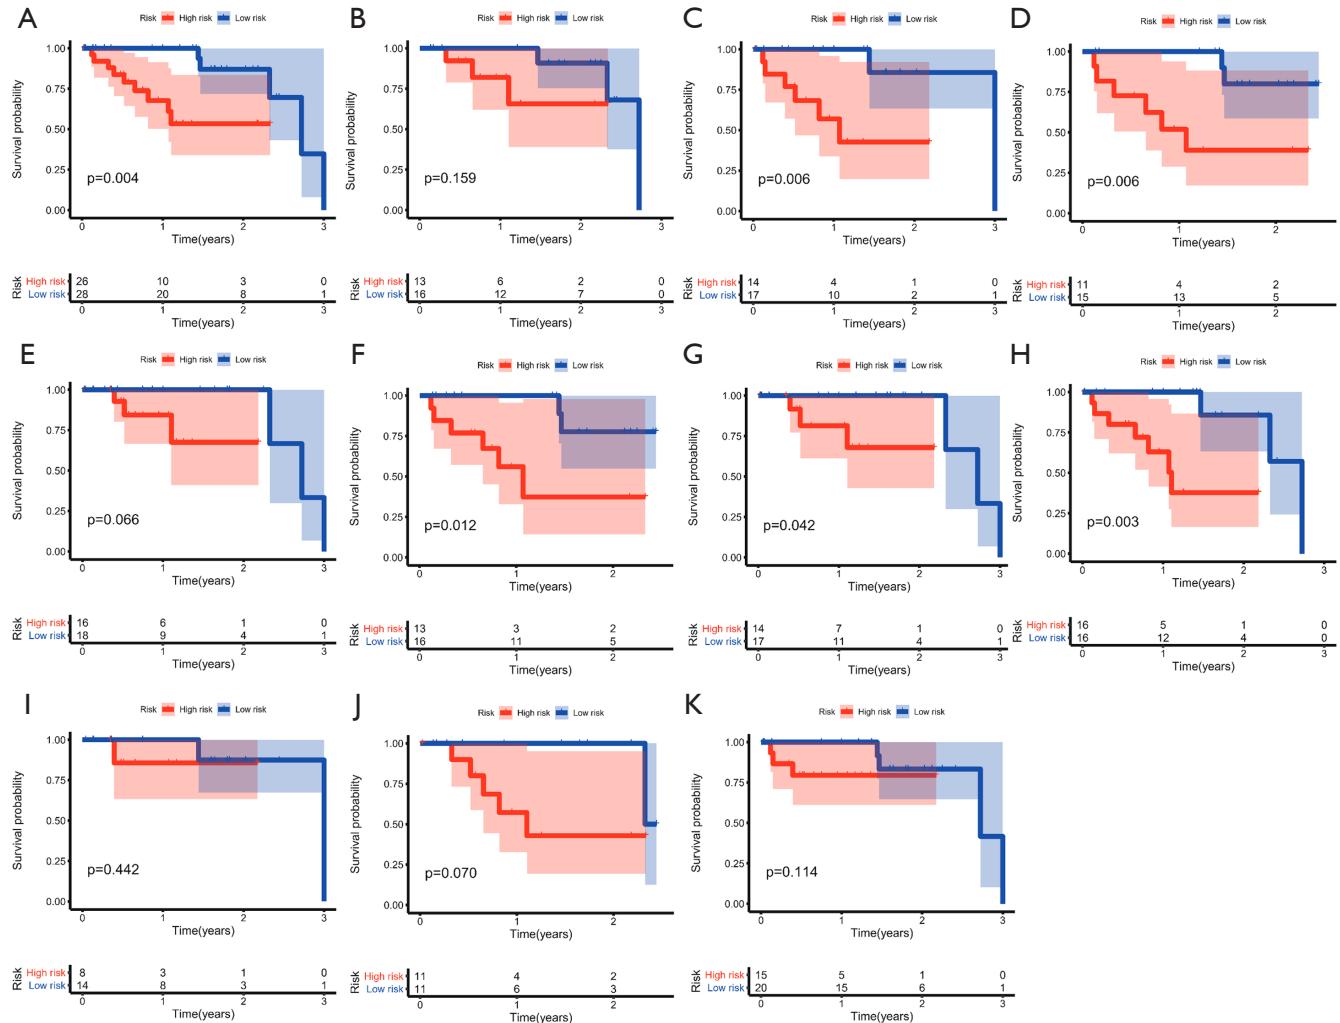

Figure S2 Kaplan-Meier survival analysis in different groups. (A) Male group; (B) young age group (≤ 60 years); (C) old age group (>60 years); (D) high level group of ALT (>40 U/L); (E) low level group of ALT (≤ 40 U/L); (F) high level group of AST (>40 U/L); (G) low level group of AST (≤ 40 U/L); (H) high level group of GGT (>50 U/L); (I) low level group of GGT (≤ 50 U/L); (J) high level group of AFP (>25 ng/L); (K) low level group of AFP (≤ 25 ng/L). The red represented patients in the high-risk group. The blue represented patients in the low-risk group. ALT, alanine aminotransferase; AST, aspartate aminotransferase; GGT, gamma-glutamyl transferase; AFP, alpha-fetoprotein.
