

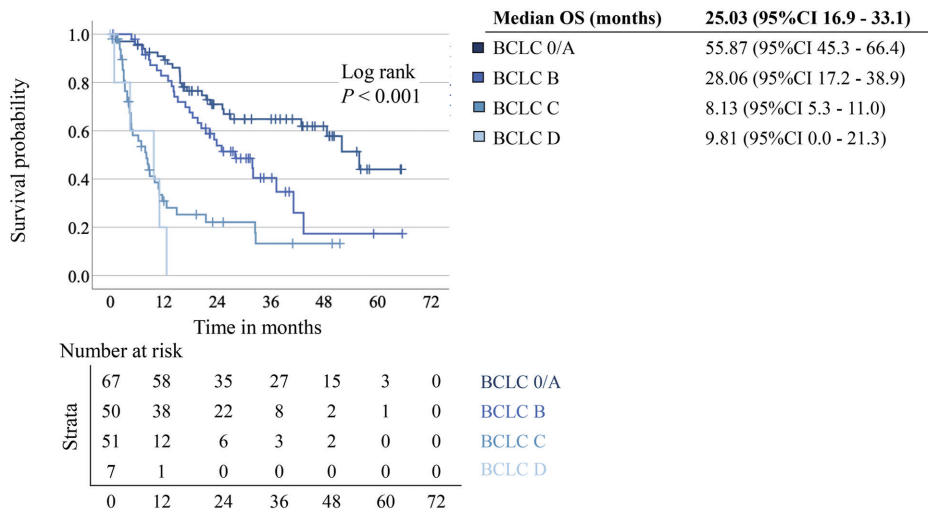

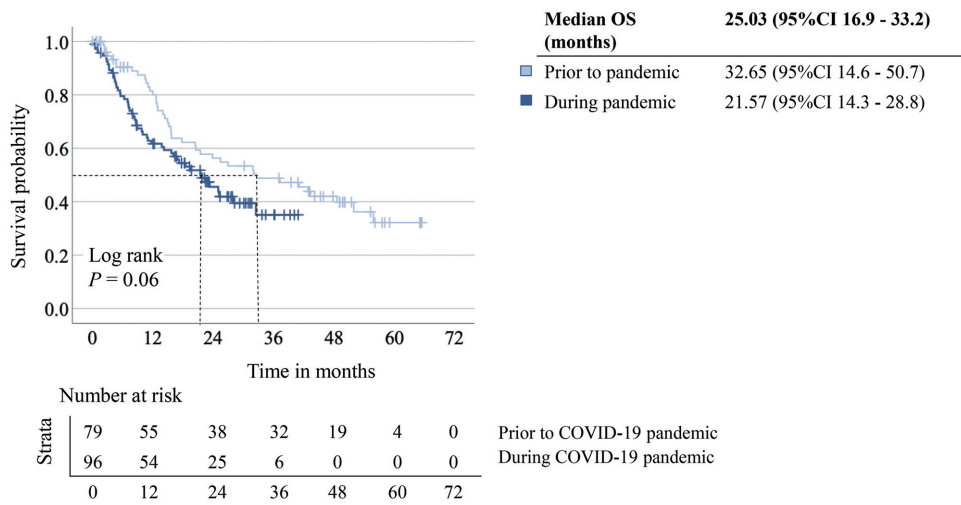

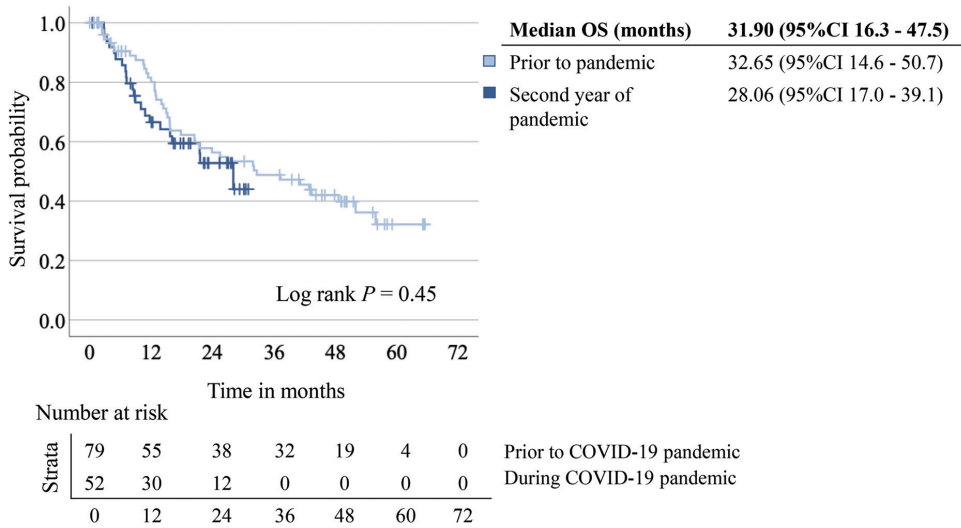

**Figure S1** BCLC stages of HCC diagnosed before (A, pre-COVID-19) and during the COVID-19 pandemic (B, COVID-19) over time.

**Figure S2** Survival probability and median OS in months after initial diagnosis according to BCLC stage (number at risk). Vertical ticks represent censored observations.

**Figure S3** Survival probability and median OS in months after initial diagnosis in patients diagnosed in the pre-COVID-19 era vs. COVID-19 era (number at risk). Vertical ticks represent censored observations.

**Figure S4** Survival probability and median OS in months after initial diagnosis in patients diagnosed within the second year of the pandemic (March 2021 through February 2022; number at risk). Vertical ticks represent censored observations.
