

Table S1 Characteristics of the eight total occlusive lesions treated

Lesion characteristics	N (%)
Etiology	
FMD	2 (25.0)
TA	5 (52.5)
NF1	1 (12.5)
Lesion location	
Ostial	5 (62.5)
Truncal	2 (25.0)
Branch	1 (12.5)
Succeeded recanalization	6 (75.0)

FMD, fibromuscular dysplasia; TA, Takayasu arteritis; NF1, neurofibromatosis type 1.

Table S2 Symptoms of 36 patients with PTRA at last follow-up

Symptoms apart from hypertension	N (%)
Asymptomatic	16 (44.4)
Mild symptoms	12 (33.3)
Target organ damage	8 (22.2)
Hypertensive retinal fundus lesion	1 (2.8)
LVH	8 (22.2)

PTRA, percutaneous transluminal renal angioplasty; LVH, left ventricular hypertrophy.
